## 34 SETS OF COMMENTS MADE

No large wind turbines - a blot on the landscape!

**F40 none of the above**

**F39 - footpaths and bridleways are shocking in places Apparent desire to keep people "off their land" in specific cases**

**F39 - added to amount of traffic - slow it down**

**F40 Definitely not wind turbines**

**F39 speed control of traffic**

**F39 - Any new housing would be built with energy saving elements / F39 - We take recycling (clothing, metal, old electrical items) into Sherborne. I would use clothes banks, shoe bank if we had them in Holwell**

**F39 Stop dogs barking continuously / F40 Solar panels - small scale**

**If the government made it law all new builds would have to incorporate solar panels. Ironic in Europe parking bays have solar panels, not like in UK, fields of solar panels. New renewable ideas will no doubt become available in the future.**

**Re F40: If it means cheaper electricity bills.**

**Thank you to the farmers that trim their hedges but many road signs are overgrown and not readily visible to motorists.**

**Re F40: Solar panels on individual houses / Ref F40: Wind turbines unsightly; biomass not suitable. Best option (is) individual solar panels**

**SMALL SCALE SHOULD BE ENCOURAGED**

**WE NEED TO BE AWARE THAT SHERBORNE TIP HAS STARTED TO CHARGE FOR CERTAIN ITEMS, THIS WILL INEVITABLY INCREASE, WE HAVE ALREADY EXPERIENCED INCREASED 'FLYTIPPING' MAYBE A CENTRAL RECYCLING AREA COULD BE PROVIDED, AS THEY DO IN SOME AREAS OF THE UK**

**F40 A BIOMASS SYSTEM FOR A NEW DEVELOPMENT WOULD ONLY BE VIABLE IF LOCAL FARMERS WOULD GROW CROPS FOR FUEL. I WOULDN'T WANT WOOD CHIPS BE TRANSPORTED FROM A LONG WAY AWAY.**

**SOLAR PANELS FOR HOME OWNER CHOICE IS ON THEM TO HELP THEMSELVES**

**Please no wind turbines!**

**F40 - I don't know enough about them**

**F39 - less litter**

**Ground and air source heat pumps are the most environmentally friendly**

**F40 Solar panels on existing buildings rather than field sites**

**F39 Irresponsible lighting on bonfires resulting in pollution etc**

**I would not want any scheme that create vibration/noise**

**Wouldn't want a field of solar panels visible from my windows**

**Re F40: Problems with large scale schemes in a village which is spread out.**

**F40 Solar panels on roofs I think the local council should supply every household with one solar panel**

The footpaths are totally inadequate for walking and dog walking. They are poorly marked and poorly maintained and in some areas totally inaccessible, eg the path from Stony Lane to Bishops Caundle via the church

**F39 Free solar panels for OAPs**

**F40 I would like for information about Biomass heating**

**F39 Access and upkeep of footpaths is poor and needs improvement**

**F39 Reducing traffic is global problem. I doubt Holwell has the solution**

**Solar field should not impinge on enjoyment of the countryside**

**D40 Wind turbines don't need to be huge; a few smaller ones are less intrusive than one huge one**

**F40: I don't know enough about biomass to comment.**
